<b>Fax:</b>	N/A
<b>E-mail:</b>	<i>Ashbyce@ashbye.leics.sch.uk</i>
<b>Date profile Completed:</b>	September 2019
<b>Date of Review:</b>	September 2020

## The Public Health Profile

This Public Health-profiling tool establishes:

- The health profile of the school community
- Identifies priorities for action and
- Provides a framework to encourage and support school-based partnerships.

This profile should be used in conjunction with the Public Health England (PH) health profile (available from <https://fingertips.phe.org.uk/profile/health-profiles>) and will help to support Primary aged school children and their families, through evidence based public health interventions, to improve family and community capacity whilst champion health promotion.

A public health profile will be developed for every school which will reflect the school community. Whilst schools may share geographical locations or roles, each school is unique, this tool allows for the diverse nature of schools to be recognised.

It is the **responsibility of the Public Health Nurse** to ensure that it is completed in partnership with the school. The information needed to complete this profile will be obtained from various sources and the gathering of this information is the responsibility of the Public Health Nurse.

The tool is underpinned by the principles of:

- Healthy Together 0-19 (LPT,2017)
- Healthy Child Programme (DOH, 2009)

## Purpose of the tool

The public health profile will support schools to:

- Establish a clear and concise picture of health issues within the school and the wider community.
  - Identify priorities to inform a plan of action in line with current Key performance indicators and service specifications, for the forthcoming academic year
  - identify the broad range of partners involved within the school to promote health
-

## Public Health Nurse Information and Resources

Public Health Nurse	Tracy Shearer
Postal address	Coalville Health Centre
	1 Market Street
	Coalville, Leicestershire
Postcode:	LE67 3DX
Public Health Nurse Cloud number	01530 468570
Text Service	<b>Parent Chat Text 07520615382</b>
